

****AI Engineer****

Location: Ahmedabad, India

Experience: 1–3 years in AI / ML / Data Science (Freshers with strong projects can be considered)

Employment Type: Full-time

CTC: As per company standards

Joining Time: Immediate / Within 30 Days

****Role Overview****

As an AI Engineer at WOGOM, you will play a pivotal role in developing and implementing cutting-edge AI and machine learning solutions that drive business growth and improve customer experiences. You will be responsible for designing, building, and deploying AI models that enable data-driven decision-making and optimize business processes. Your expertise will help us stay ahead of the curve in the rapidly evolving AI landscape. You will work closely with cross-functional teams to identify business needs and develop innovative solutions. Your contributions will have a direct impact on our business outcomes and customer satisfaction.

****About WOGOM****

WOGOM is a B2B Commerce and Retail Enablement Platform, empowering 6,000+ retailers and 450+ sellers across India with better Products, Pricing, Credit, and Growth Opportunities. Our goal is to build a connected ecosystem where technology, capital, and commerce converge to help Indian retailers scale with confidence.

****What You'll Do****

- Develop and deploy AI and machine learning models that drive business growth and improve customer experiences
- Collaborate with cross-functional teams to identify business needs and develop innovative solutions
- Design and implement data pipelines and architectures to support AI and machine learning workloads
- Work with data scientists to develop and deploy predictive models that inform business decisions
- Optimize AI and machine learning models for performance, scalability, and reliability
- Stay up-to-date with the latest AI and machine learning trends and technologies
- Leverage natural language processing (NLP) and computer vision techniques to enhance our platform's capabilities
- Implement DevOps practices and tools such as Docker and Kubernetes to ensure efficient model deployment and management
- Utilize data visualization tools like Tableau or Power BI to communicate insights and drive business decisions
- Participate in agile development methodologies and version control systems like Git to ensure seamless collaboration and code management
- Strong understanding of AI and machine learning concepts and techniques
- Proficiency in programming languages such as Python, Java, or C++
- Experience with deep learning frameworks such as TensorFlow or PyTorch
- Knowledge of data engineering and data warehousing concepts
- Experience with cloud-based AI and machine learning platforms such as AWS or GCP
- Strong problem-solving and analytical skills
- Strong communication and collaboration skills
