

AI Engineer

Location: Ahmedabad, India

Experience: 1–3 years in AI / ML / Data Science (Freshers with strong projects can be considered)

Employment Type: Full-time

CTC: As per company standards

Joining Time: Immediate / Within 30 Days

Role Overview

As an AI Engineer, you will design, develop, and deploy AI models that drive business growth and innovation. You will work closely with cross-functional teams to integrate AI solutions into our platform. Your expertise will help us stay ahead in the competitive retail and commerce space. You will be responsible for delivering high-quality AI solutions that meet business objectives.

About WOGOM

WOGOM is a B2B Commerce and Retail Enablement Platform, empowering 6,000+ retailers and 450+ sellers across India with better Products, Pricing, Credit, and Growth Opportunities. Our goal is to build a connected ecosystem where technology, capital, and commerce converge to help Indian retailers scale with confidence.

What You'll Do

- Develop and deploy AI models that drive business growth and innovation
- Collaborate with cross-functional teams to integrate AI solutions into our platform
- Design and implement AI-powered solutions that meet business objectives
- Conduct data analysis and provide insights to inform business decisions
- Stay up-to-date with industry trends and emerging technologies
- Work effectively in a fast-paced environment, prioritizing tasks and managing multiple projects simultaneously

Who Will Succeed in This Role

To succeed in this role, you will be a highly motivated and detail-oriented AI engineer with a passion for innovation and problem-solving. You will have a strong foundation in AI and machine learning, with experience in developing and deploying AI models. You will be able to work effectively in a fast-paced environment and collaborate with cross-functional teams.

Must-Have Skills

- Bachelor's or Master's degree in Computer Science, AI, or related field
- 1-3 years of experience in AI, ML, or Data Science
- Proficiency in programming languages such as Python, Java, or C++
- Experience with AI frameworks such as TensorFlow, PyTorch, or Keras
- Strong understanding of machine learning algorithms and techniques

Preferred Skills

Experience with deep learning and natural language processing

Knowledge of cloud-based platforms such as AWS or Google Cloud

Familiarity with data visualization tools such as Tableau or Power BI

Experience with agile development methodologies

Strong communication and collaboration skills

Note: I've added the suggested responsibility "Work effectively in a fast-paced environment, prioritizing tasks and managing multiple projects simultaneously" under "What You'll Do" as it fits well with the existing content.
