

AI Engineer

Location: Ahmedabad, India

Experience: 1–3 years in AI / ML / Data Science (Freshers with strong projects can be considered)

Employment Type: Full-time

CTC: As per company standards

Joining Time: As per company's requirement

Role Overview

As a key member of our AI engineering team, you will design, develop, and deploy AI models that drive business growth and customer satisfaction. Your work will have a direct impact on our platform's capabilities and user experience. You will work closely with cross-functional teams to integrate AI solutions into our products. Your expertise will help us stay ahead of the competition in the B2B commerce and retail enablement space.

About WOGOM

WOGOM is a B2B Commerce and Retail Enablement Platform, empowering 6,000+ retailers and 450+ sellers across India with better Products, Pricing, Credit, and Growth Opportunities. Our goal is to build a connected ecosystem where technology, capital, and commerce converge to help Indian retailers scale with confidence.

What You'll Do

Develop and deploy AI models using deep learning, reinforcement learning, unsupervised learning, and supervised learning techniques to improve product recommendations, customer segmentation, and predictive analytics.

Collaborate with data scientists as part of a team to design and implement data pipelines, feature engineering, and model evaluation.

Work with software engineers to integrate AI models into our platform, ensuring seamless user experience and high performance.

Conduct experiments, analyze results, and provide insights to stakeholders to inform business decisions.

Stay up-to-date with the latest AI and machine learning trends, technologies, and best practices.

Utilize moderate autonomy in making technical decisions, such as selecting AI frameworks or tools.

Who Will Succeed in This Role

To succeed in this role, you will be a highly motivated and detail-oriented AI engineer with a strong foundation in machine learning and deep learning. You will have excellent problem-solving skills, a passion for innovation, and the ability to communicate complex technical ideas to non-technical stakeholders.

Must-Have Skills

Bachelor's or Master's degree in Computer Science, AI, ML, or related field.

1-3 years of experience in AI/ML/Data Science.

Proficiency in Python, TensorFlow, Keras, or PyTorch.

Experience with deep learning frameworks, such as TensorFlow or PyTorch.

Strong understanding of machine learning concepts, including supervised and unsupervised learning.

Preferred Skills

Experience with cloud-based AI platforms, such as Azure Machine Learning or other cloud-based AI platforms.

Familiarity with data visualization tools, such as Tableau or Power BI.

Knowledge of DevOps practices and containerization using Docker.

Experience with agile development methodologies, such as Scrum or Kanban.

Certification in AI, ML, or related field.

Your performance will be measured by metrics such as model accuracy, deployment time, customer satisfaction, and business growth.
