

AI Engineer

Location: Ahmedabad, India

Experience: 1–3 years in AI / ML / Data Science (Freshers with strong projects can be considered)

Employment Type: Full-time

CTC: As per company standards

Joining Time: As per company requirement

Reporting To: Reporting Manager

Role Overview

Design, develop, and deploy AI and machine learning models to drive business growth and improve operational efficiency.

Collaborate with cross-functional teams to integrate AI solutions into our platform.

Ensure the scalability, reliability, and security of AI-powered systems.

Stay up-to-date with the latest advancements in AI and ML to drive innovation.

Contribute to the development of AI-powered features and tools that enhance user experience.

What You'll Do

Develop and train AI and ML models using various algorithms and techniques.

Implement and deploy AI-powered solutions using relevant programming languages and frameworks.

Collaborate with data scientists to design and implement data pipelines and architectures.

Conduct thorough testing and validation of AI-powered systems to ensure quality and reliability.

Troubleshoot and resolve issues with AI-powered systems in a timely and efficient manner.

Who Will Succeed in This Role

To succeed in this role, you should be a self-motivated and detail-oriented individual with a passion for AI and ML. You should be able to work effectively in a team environment and communicate complex technical concepts to non-technical stakeholders.

Must-Have Skills

Proficiency in programming languages such as Python, Java, or C++.

Experience with AI and ML frameworks such as TensorFlow, PyTorch, or Scikit-learn.

Strong understanding of data structures, algorithms, and software design patterns.

Familiarity with cloud-based platforms such as AWS or GCP.

Excellent problem-solving and analytical skills.

Preferred Skills

Experience with deep learning techniques and neural networks.

Knowledge of natural language processing (NLP) and computer vision.

Familiarity with containerization using Docker or Kubernetes.

Experience with agile development methodologies and version control systems.

Strong understanding of data visualization and business intelligence tools.

Clarification Answers:

□

Optional Suggestions:

1. Consider adding a section on "What We Offer" to highlight the company's benefits and perks.
2. Add a bullet point to "What You'll Do" regarding the maintenance and updates of AI-powered systems.
3. Emphasize the importance of collaboration with other teams in the "Role Overview" section.
4. In the "Must-Have Skills" section, consider adding a bullet point on experience with version control systems.
