

AI Engineer

Location: Ahmedabad, India

Experience: 1–3 years in AI / ML / Data Science (Freshers with strong projects can be considered)

Employment Type: Full-time

CTC: ■6 LPA – ■12 LPA (depending on experience and skill level)

Joining Time: As per company requirement

Reporting To: Reporting Manager

Role Overview

As an AI Engineer, you will play a crucial role in developing and implementing cutting-edge artificial intelligence and machine learning solutions to drive business growth and innovation. Your expertise will enable us to make data-driven decisions, improve operational efficiency, and enhance customer experiences. You will work closely with cross-functional teams to design, develop, and deploy AI-powered applications that meet our business objectives. Your contributions will have a significant impact on our company's success, and we are looking for a talented individual who can help us achieve our goals.

What You'll Do

- Design, develop, and deploy AI-powered applications using machine learning and deep learning algorithms
- Collaborate with data scientists and engineers to integrate AI solutions into our existing infrastructure
- Develop and maintain high-quality, scalable, and secure AI models and algorithms
- Work closely with cross-functional teams to identify business opportunities and develop AI-powered solutions
- Continuously monitor and improve AI model performance, accuracy, and efficiency
- Utilize cloud-based AI platforms such as AWS SageMaker or Google Cloud AI Platform to deploy and manage AI models

Who Will Succeed in This Role

To succeed in this role, you should be a self-motivated and detail-oriented individual with a passion for artificial intelligence and machine learning. You should be able to work effectively in a team environment, communicate complex technical concepts to non-technical stakeholders, and adapt to changing priorities and deadlines. Your ability to learn quickly, think critically, and solve complex problems will be essential in driving business growth and innovation.

Must-Have Skills

- Bachelor's or Master's degree in Computer Science, Artificial Intelligence, Machine Learning, or related field
- 1–3 years of experience in AI/ML/Data Science (freshers with strong projects can be considered)
- Proficiency in programming languages such as Python, Java, or C++
- Experience with machine learning frameworks such as TensorFlow, PyTorch, or Scikit-learn
- Strong understanding of data structures, algorithms, and software design patterns

Preferred Skills

- Experience with deep learning frameworks such as Keras or Caffe
- Knowledge of natural language processing (NLP) and computer vision
- Familiarity with agile development methodologies and version control systems such as Git
- Strong communication and presentation skills
